SUMMARY

Highly motivated and skilled Full Stack Developer with 1+ year of experience working in a dynamic, product-based startup environment. Proficient in modern web development technologies including Node.js, MongoDB, TypeScript, Next.js, SQL, React.js, and JavaScript. Demonstrated ability to design, develop, and deploy scalable web applications, with a strong focus on performance and user experience. Adept at collaborating with cross-functional teams to deliver high-quality software solutions that meet business objectives and enhance user satisfaction.

WORK EXPERIENCE

SDE 1, Vmedulife Software, Pune   **May 2023 - Present**

- Improved page load time by using performance optimization techniques.
- Reduced API response time through efficient use of asynchronous operations.
- Resolved critical production bugs that improved system stability and reduced downtime.
- Led the development of an Academic Planning module, coordinating with a cross-functional team to deliver a solution that enhanced academic efficiency.
- Developed a module for collecting online feedback from students and faculty, improving the feedback process and engagement.
- Successfully delivered client requirements by developing and implementing solutions ahead of deadlines, improving client satisfaction.

PROJECTS

Heybartender   Github

A MERN-based web application designed to assist bartenders and recent bartending graduates in honing their skills and managing their tasks effectively.

Nyresa   Github

A clone of the e-commerce website Mytheresa, replicating its key features and user experience to provide a seamless online shopping platform.
